2. The items marked with an asterisk (*) were expected to be delivered on schedule, according to source. On the other hand, only half of the rubber boots and clothing was likely to be available, and forty per cent. of the "Lersol" from Wolfen. It was also believed that the quotas would not be filled for glove leather and abrasives; in a number of other cases source notes that the filling of the quota is doubtful.
3. The following list shows the quantities of certain commodities to be delivered from Saxony to the Soviet sector of Berlin during the third quarter of 1947. Items marked with an asterisk seem to correspond to items in the list in para. 1.
